

Latex Balloon Colours

When filled with helium, 10" standard balloons will float for around 12 hours, 12" standards for around 16 hours and 11"/12" pearlescent for around 18 hours. In most instances they will float for longer, but it's dependent on a number of other factors. Note that 5" balloons will not hold enough helium to float at all.

The colours shown here are a guide only; actual balloon colours may differ slightly
